

Save The Post Office

June 9, 2021

We all have seen the dire consequences of having an inefficient postal service in 2020 during the pandemic. People didn't get their medications, their bills weren't paid and fines were levied, and people didn't get checks needed for basic food and rent. Any further reduction in service would not only hurt the American people but would undermine the system as a whole, making it vulnerable to being privatized. If that were to happen, a for-profit system would only line the pockets of the administrators and further reduce the interests of the people who rely on the system. Look at the outcome of prison privatization. The system profits, the people are exploited, not protected.

Please, do not further compromise a system that has been essential for so many people for so many reasons. Protect, preserve and strengthen the US Postal Service.

Thank You, Ellen Debach-Riley
